LinkedIn: linkedin.com/in/hassan-jan-44746b395 | GitHub: github.com/Hassan-4323

PROFESSIONAL SUMMARY

Computer Science graduate and Full-Stack MERN Developer with hands-on academic project experience building responsive web applications and database-backed platforms. Experienced in React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs and JWT authentication. Developed a tourism recommendation system using data-mining techniques and contributed to the architecture of an AI-powered code analysis platform. Interested in full-stack development, practical problem solving and building user-focused software.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML, CSS, Bootstrap, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, JWT authentication, TypeScript

Databases & tools: MongoDB, MySQL, Redis, BullMQ, Docker, Git-style diffs, AST analysis

Additional: Web development, data analysis, App Store Optimization (ASO), keyword research, competitor analysis

PROJECTS

Data Mining for Favourite and Safe Places Prediction in Tourism Industry | Final Year Project | Jul 2025 - Jul 2026

Role: Full-Stack MERN Developer | React.js, Node.js, Express.js, MongoDB, JavaScript, REST APIs, JWT

- Developed a tourism recommendation platform using traveller preferences, booking patterns, ratings and review sentiment to identify popular and potentially safer destinations.
- Built features for authentication, travel-package management, bookings, favourites, ratings, reviews and traveller-to-admin communication.
- Implemented personalised recommendation logic and an administration dashboard for managing packages, users, bookings and analytical reports.

DevRescue AI - AI-Powered Codebase Analysis and Repair Platform | Apr 2026 - Jul 2026

Role: Full-Stack Developer and Project Architect | React.js, Node.js, Express.js, TypeScript, MongoDB, Redis, BullMQ, Docker

- Worked on an AI-powered platform designed to inspect uploaded codebases, identify technology stacks and flag bugs, security vulnerabilities, performance issues and architectural problems.
- Designed workflows for proposed code patches, Git-style difference views, isolated Docker testing and user approval before changes are applied.

EDUCATION

Bachelor of Science in Computer Science | Sep 2022 - Aug 2026

COMSATS University Islamabad, Abbottabad Campus | Abbottabad, Pakistan

CERTIFICATIONS

Data Analytics (Microsoft-backed program) - Simplilearn | Feb 2026

Introduction to Image Generation - Simplilearn | Feb 2026

How to Become an AI Engineer in 2026 - Simplilearn | Feb 2026

LANGUAGES

Urdu (native) | English (B2 listening, reading and writing; B1 speaking)
